## Product Description

The SIM7600G-H is Multi-Band LTE-FDD/LTE-TDD/HSPA+ and GSM/GPRS/EDGE module solution in a SMT type which supports LTE CAT4 up to 150Mbps data transfer. It has strong extension capability with rich interfaces including UART,USB2.0, GPIO etc. The module provides much flexibility and ease of integration for customer's application.

The package of SIM7600G-H is LCC+LGA. The package (LCC part) of SIM7600G-H is compatible with SIM7600x-H (LTE CAT-4 Variants module with LCC package). AT commands of SIM7600G-H are mostly compatible with SIM7500/SIM7600 Series modules. This also minimize the investments of customers, and enables a short time-to-market.

It is designed for applications that need high throughput data communication in a variety of radio propagation conditions. Due to the unique combination of performance, security and flexibility, this module is ideally suited for many applications.
